OCTOBER 21, 2021

**ATTENTION: RESIDENTS, FAMILIES AND FRIENDS,**

This notice will serve as an update to our on-going conversations regarding the construction project at white plains center for nursing care. As you know, we will be renovating the lobby, first floor dining room, and also flooring in the main hallway and the post road hallway, along with the nursing stations on the post road unit.

This project will start on Wednesday, October 27, 2021 and will involve the following changes:

1. Main entrance to the facility will be accessed through the back door in the basement where the reception desk will be relocated with the kiosk for sign-in by all visitors.
2. There will be no access to the facility via the front door until further notice except for construction workers and equipment.
3. Temporary isolation walls will block access to the construction areas while still allowing staff and residents safe passage to the elevator for their use.
4. There will be minimal, if any, disturbances to the day-to-day life of the residents. All reasonable and necessary efforts will be taken to insure that usual daily activity and quality of life for our residents, staff and visitors will not be adversely affected. Any changes to routines will be approved in advance by the management team of the facility.
5. All resident meals, recreational activities and visitation will take place on the second floor in the dining room during this project.
6. All swabbing, as needed, for visitations and vendor admittance, will be conducted in a designated area of the basement, location to be announced.
7. The construction project will be conducted in phases and updates will be posted on the website, via email and mailings.
8. In the last stages of the construction plan, the façade of the building will be updated and the entire exterior of the facility will be painted.

Your continued cooperation throughout this project will be appreciated. Thank you.

Linda Loffredo, Administrator  
Candeish Thomas, Director of Nursing  
Denise Tirado, Director of Environmental Services
