

**WHITE PLAINS CENTER FOR NURSING CARE**  
**Visiting a Resident in our Facility**

The following information is posted here on our website for all visitors, families, and friends of our White Plains Center Residents. Hopefully, this will facilitate your visiting process and allow you to visit your loved ones safely.

1. At this time, there is no active Covid testing of Visitors to our facility.
2. We do encourage visitors to be up to date on their Covid 19 vaccinations, as well as other vaccines to prevent spread of infections to our residents.
3. Masks are recommended for any visitors who are visiting residents with any cold symptoms.
4. It is recommended that anyone with cold or flu symptoms not visit until they are clear of these symptoms.
5. Visitors who request self-testing may do so at the reception desk.
6. All visitors must enter and exit the facility through the main entrance and be screened at the Kiosk in the lobby for record keeping purposes. This allows the facility to track any symptoms related to Covid-19 that are entered into the Kiosk.
7. Hand sanitizer is available through out the facility as well to be used at any time while visiting.
8. Please obey all signs in the facility with reference to precautions to be taken anywhere you are visiting

Thank you for your continued cooperation.
